

Project Overview - Monte Vista

The project objective was asked to design a pallet display to send purses, belts and wallets into Sports Academy. The display was to hold 66 products and be shipped to two distribution centers.

We conceptualized and produced 100 displays.

Our fulfillment center completed the project by:

- Assembling the displays

- Preparing the product by removing it from plastic bags and snipping off a plastic belt hanging tab

- Packing out the displays with

- 30 Purses, in five styles, one with two colors

- 12 Wallets in two styles

- 24 Belts in two styles and four sizes

- Added fillers to keep the product from shifting in transit

- Placing each display into an individual shipper

- Labeling it for a distribution center
